

# Eppley Institute for Research in Cancer

## 2007-2008 Seminar Series

Seminars will be held in the Eppley Science Hall Amphitheater Room 3010 from 4 – 5 p.m. unless otherwise noted. Topics will be published in UNMC TODAY as they become available.

- September 6** **Jenny Pan-Yun Ting, MD, PhD**, Professor, Department of Microbiology & Immunology, Immunology Program Leader, Lineberger Comprehensive Cancer Center, University of North Carolina-Chapel Hill.  
"Genomic identification of novel innate and adaptive immune genes."
- September 13** **Anindya Dutta, MD, PhD**, Byrd Professor of Biochemistry & Molecular Genetics, University of Virginia Health Sciences Center  
"DNA replication initiation and genomic instability in cancer cells"  
\*\*(EPPLEY INSTITUTE AUDITORIUM)\*\*
- September 20** **Hsing-Jien Kung, PhD**, Professor, Biochemistry & Molecular Medicine, UC Davis Cancer Center, Deputy Director, Associate Director of Basic Science  
"Oncogenic Activation of Androgen Receptor in Prostate Cancer"
- September 27** **Eleanor Rogan, PhD**, Professor, UNMC, Eppley Institute  
"Safety Seminar"  
\*\*(ATTENDANCE IS REQUIRED FOR ALL EPPLEY INSTITUTE LAB PERSONNEL)\*\*
- October 4** **\*\*\*Bay Lecturship\*\*\***  
**William N. Hait, MD, PhD**, President, American Association for Cancer Research, former Director of the Robert Wood Johnson Comprehensive Cancer Center of New Jersey, and currently, Johnson & Johnson's Head of Worldwide Hematology and Oncology Research and Development  
\*\*(NOON AT THE DRC AUDITORIUM)\*\*
- October 11** **Yue Xiong, PhD**, William R. Kenan Distinguished Professor, Biochemistry and Biophysics Lineberger Comprehensive Cancer Center, University of North Carolina-Chapel Hill.  
"Control of Stem and progenitor cell cycle"
- October 18** **Michael Edidin, PhD**, Professor, Department of Biology, Johns Hopkins University  
"The joys of aggregation - Class I MHC molecules, membrane organization and antigen presentation"
- October 25** **Lori Wallrath, PhD**, Associate Professor, Michigan State University  
"Heterochromatin Protein 1 (HP1): Linking Drosophila gene silencing and human breast cancer progression"
- November 1** **Juan Bruses, MD, PhD**, Associate Professor, Anatomy & Cell Biology, University of Kansas Medical Center  
"TBA"
- November 8** **Janice Blum, MD, PhD**, Associate Professor, Anatomy & Cell Biology, University of Kansas Medical Center  
"TBA"
- November 29** **Konrad Hochedlinger, PhD**, Assistant Professor of Medicine, Massachusetts General Hospital, Center for Cancer Research  
"Reprogramming of somatic cells by defined factors"
- December 6** **J. H. Prestegard, PhD**, Eminent Scholar of NMR Spectroscopy, Professor of Chemistry & Biochemistry, Complex Carbohydrate Research Center,  
"TBA"
