UNIVERSITY OF NEBRASKA AT OMAHA
STEM TRAIL CENTER

Year 1 in Review

Progress on year 1 goals:

Establish a sustainable infrastructure for STEM TRAIL Center

- We met this goal gratefully by being recognized as a 'UNO Big Idea,' building increased grant activity from a diversity of stakeholders, and began to hire core staff.

Work to communicate who we are, what we do, and how we can support you as a stakeholder

- We met this goal by establishing a newsletter, developing videos, holding our STEM launch event, seminars, workshops, and webinars with STEM Leadership Team ambassadors.

What's next?

①

Significantly expand programming for undergraduate professional development

②

Add a coaching and mentoring framework for Faculty

③

Mobilize an arm surrounding scientific communication

④

Online tool and game development for youth, parents, and teachers

SUMMER IS HERE

Thank you for a great year!

Tune in for news!
