

2021 Mosaics in Science Diversity Internship Program

The Mosaics in Science Diversity Internship Program is a 12-week summer internship designed to engage racially diverse university students and recent graduates who are under-represented in natural resource fields with on-the-ground work experience in the National Park System.

BENEFITS

- \$4,800 stipend and park housing
- All travel costs covered
- Participation in end-of-summer career workshop
- Professional development via weekly webinars
- Eligible for Public Land Corps (PLC) Non-Competitive Hiring Authority or Direct Hire Authority (DHA)

BASIC ELIGIBILITY

- Age 18 to 30 inclusive, and military veterans up to age 35
- US citizens or permanent legal residents (green card holders)
- Have a strong interest or relevant experience in areas including inventory and monitoring, research, GIS and other technologies, interpretation and education, or other related fields
- Racially diverse university students and recent graduates who are under-represented in natural resource fields are highly encouraged to apply
- Must be able to pass a federal background check
- For Direct Hire Authority (DHA) – Resource Assistant Positions: must be enrolled in an undergraduate, graduate, or PhD degree program at an accredited institution of higher education during the summer internship and graduate after the completion of the internship. Persons enrolled in a certificate program do not qualify for DHA positions.
