MRI TECHNOLOGIST

MRI technologists use innovative technologies to create diagnostic images by determining and setting technical parameters and positioning the patient to create images that accurately display anatomy and pathology. In addition to technical expertise and computer literacy, excellent communication skills are essential for MRI technologists who are responsible for patient education, instruction, and safety.

“The UNMC MRI program gives me the opportunity to obtain classroom and clinical experience while being a distant student. Throughout the program, I am able to gain practical knowledge and put those skills into action while demonstrating the highest quality of patient care and service.”

-UNMC, MRI Program Graduate

“I love being an MRI Technologist because I get to meet all types of people. If you’re a social person, this is a great career option for you. Working with the MRI scan machines is fun too. It makes you really feel like you’re in charge!”

-UNMC, MRI Program Graduate
