The Course:
According to the 2010, U.S. Population Census estimates there are approximately 48.5 million Latinos in the U.S. It is projected that by 2050 approximately more than 40% of the U.S. population will be Latino or of Latino origin. This demographic shift has had and will have a significant impact on American culture besides its obvious demographic, economic, social, and political implications. Thus, the purpose of this course is to introduce the historical, cultural, and intellectual development of Latinos in the U.S. Attention will focus on the cultural experiences, achievements and contributions of Mexican-American, Puerto Ricans, and Cuban-Americans, which comprise the majority of the Hispanic population in the country. We will examine early and recent understandings of Hispanic-Latino culture and its wealth of literary, artistic, and creative representations within the broad spectrum of Latino diversity. This is a survey course and is intended as an introduction to the very rich and complex assortment of cultural expressions of Latino culture.
