DECISION-MAKING FOR SUSTAINABILITY

Supply chains are dynamic and can be impacted by disruptions such as pandemics, natural disasters, or geopolitical events. As a result, nearly all graduates will have opportunities to manage supply chains or collaborate with supply chain managers within their industry.

The core required courses provide a foundation of actionable knowledge that can be instrumental in making responsible decisions that impact people, profit, and the planet. Students who complete a minor will have improved critical thinking skills, negotiation skills, and analytical skills. The focus on real-world applications will provide students with the skills and confidence to become influential leaders in the future.
