

CONCENTRATION IN CHILD, YOUTH, AND COMMUNITY SCIENCE

Students in the Teacher Education Department now have the flexibility to earn an education degree without pursuing teacher certification.

BS in Elementary Education with a Child, Youth, and Community Science Concentration begins Fall 2024!

This innovative concentration will provide students with hands-on leadership and learning opportunities, and will prepare graduates to work in educational settings outside of classrooms and schools. Employment possibilities include careers with non-profit organizations, museums, youth and child development, outreach programs, and in the corporate sector.

Students pursuing the Child, Youth, and Community Science Concentration will complete 120 credit hours of coursework including a capstone course with internship. Flexibility exists for minor programs and elective credits.
