

## **Classroom Management: Creating a Safe Space!**

Keeping students on-task before and during classroom physical activity can be a struggle.

1. Set expectations early on. Let students know exactly what will be happening and how you expect them to behave.
2. Use start and stop signals, try to use the same signals every time so the students get used to them.
3. Ensure students have their own "bubble" of personal space.
4. Show your enthusiasm either by participating or cheering on your students!
5. Be persistent! Some students may be reluctant to participate at first.
