

# BRAIN BLASTER OF THE WEEK

## Classroom Organization: Maximize Your Space

Many teachers in the Omaha Metro shy away from brain blasters because they don't feel they have adequate classroom space to give kids room to move and keep them safe at the same time. Try some of these classroom organization tips to help maximize your classroom space.

1. Remove excess or over-sized furniture – make sure furniture has a purpose
2. Create different zones within the room – one for group activity
3. Rearrange desks or tables to create larger open areas
4. Establish a routine with students to create a temporary open space for brain breaks
5. Utilize storage areas for both teacher and student to clear clutter
6. Rearrange or downsize the location of the teacher's desk
7. Combine desks into group tables
