Transfer Policy
Undergraduate Athletic Training Program

Information about applying to UNO as a transfer student can be found at:
http://admissions.unomaha.edu/transfer.php.

It is the policy of the UNO ATP to evaluate each prospective transfer student individually in order to assess the feasibility and ability for coursework and/or clinical experiences to transfer to both UNO and the UNO ATP. The following procedures are used:

1. Prospective students should contact the Program Director via email or phone to discuss his/her desire to transfer.
2. Prospective students should complete the UNO Undergraduate ATP Application. This application must be submitted by the deadline (February 28th) UNLESS alternate arrangements have been approved by the Program Director.
3. Prospective students should submit all undergraduate transcripts from all colleges attended. They may also be asked to submit course syllabi/outlines/schedules for particular courses as requested by the Program Director.
4. The Program Director will assess the application and the coursework of the student to determine if a transfer is feasible and possible.

IN MOST CASES:

• Students attempting to transfer from another college/university who have NOT been enrolled in a CAATE-accredited AT program and have NOT taken any ATP-specific coursework must meet the same prerequisite requirements as students enrolled at UNO. Equivalent coursework for PE 2880 (Basic Physiology and Anatomy) and PE 1010 (Introduction to Athletic Training) must be taken at the prior institution in order to be considered for admission. Transcripts must be provided and course syllabi/outlines/schedules may also be requested. All application requirements (minimum GPA, clinical observation hours, etc.) also apply. Transfer students are considered as space in the program allows.

• Students attempting to transfer from another college/university who have NOT been enrolled in a CAATE-accredited AT program and HAVE completed AT-specific coursework will have to provide the syllabi and course schedule from EACH AT course that was taken at the other institution. The prospective student must also provide the contact information for the Program Director at their current institution. The UNO Program Director will contact the other institution’s Program Director and evaluate whether any AT courses can transfer into the UNO curriculum. Prospective students should realize that it is unlikely that AT courses from other institutions will transfer to UNO due largely to differences in course content, competencies and proficiencies taught, and course sequencing.
**Iowa Western Community College Students:**

Students enrolled in the IWCC Sports Medicine program may apply to the UNO ATP utilizing a 2+2 articulation agreement, currently pending approval by UNO and IWCC. Current students at IWCC may apply to the UNO ATP at this time utilizing procedures (as a prospective transfer student not enrolled in a CAATE-accredited ATP) until the 2+2 articulation agreement has been approved by both institutions. Specific information about the IWCC program can be found at: [http://www.iwcc.edu/academic_programs/program.asp?id=physedsprtsmedas](http://www.iwcc.edu/academic_programs/program.asp?id=physedsprtsmedas).
