

AVIATION INSTITUTE INTERNSHIP

NEBRASKA DEPARTMENT OF AERONAUTICS

The State of Nebraska and the Aviation Institute at the University of Nebraska at Omaha are pleased to announce an exciting internship opportunity for students pursuing a major or minor in aviation. This internship, hosted by the Nebraska Department of Aeronautics, offers students the chance to gain hands-on experience within a state aviation organization while developing practical skills relevant to the field.

During the internship, participants will engage in activities related to airport planning, navigation systems, aviation operations, and other related areas. This experience will provide valuable insight into the functions and responsibilities of a state aviation department, helping students bridge the gap between academic learning and professional practice.

Interns are expected to dedicate a minimum of eight hours per week to the program over the course of one academic semester. While the internship is unpaid, successful completion will earn the student three credit hours in AVN 4200 or AVN 8030.

To apply, students should submit a resume and cover letter and complete the application form available on the Aviation Institute's internship website.
