Executive Summary

This report presents quarterly data and evaluation updates for the Vocational and Life Skills Program (VLS) through Quarter Five of Grant Cycle Four. VLS was created by Nebraska Legislative Bill 907 in 2014 with the purpose of easing the transition for individuals who reenter the community after incarceration. This report contains 1) descriptions of the nine funded organizations across the state, 2) a snapshot of participation, 3) demographics of the participants, and 4) participation breakdowns and descriptions of the skills participants are gaining through VLS programming.

The VLS initiative is evaluated by the Nebraska Center for Justice Research (NCJR) to identify the impact service providers and programming have in increasing meaningful employment. As part of the evaluation, NCJR provides trainings to support grantees as needed, and manages participant data in a data management system created specifically for VLS. NCJR provides feedback and information to the Nebraska Department of Correctional Services (NDCS) regarding the implementation process and data updates on a monthly and quarterly basis. NCJR has collaborated with service providers to create individualized evaluation plans with manageable goals and is working to complete an overall evaluation of VLS during this grant cycle. NCJR utilizes feedback from NDCS and service providers to ensure accurate reporting. This report is submitted to the Nebraska Legislature on behalf of NDCS.

Report Definitions

NEW PARTICIPANTS

New participants represent a subset of the total participants served – those who were new to the programs this quarter. New participants with each service provider are counted only once, which is reflected in the month they began their participation.

TOTAL SERVED

Total served is a count of unique active participants for the quarter. Any participant that does not have an end date to their programming during the quarter is counted as a unique participant served. If the same person is a participant in multiple programs, they are counted once in each service provider as a unique participant for the quarter they began participating.

SUCCESSFULLY COMPLETED

Participants are considered successful when they meet the individualized plan set up for them upon intake into the programs. Once they meet this threshold, they are exited from the program and marked as successfully completed. Success looks different for each participant and varies across programs as well (see Appendix A). Because of this, comparisons between service providers based on successful completion numbers are not provided in this report.

TOTAL PARTICIPANTS (CYCLE FOUR)

The total number of participants served during Grant Cycle Four is reported here. If the same person is a participant with multiple service providers, the individual is counted once in each provider as a unique participant.

TOTAL SUCCESSFULLY COMPLETING (CYCLE FOUR)

Participants are included in the total successfully completing for the grant cycle if they meet the definition of successful completion mentioned above. This captures anyone who has an ending status of successful completion from the beginning of the grant cycle (July 1, 2020) to the end of the current quarter.

COST PER INDIVIDUAL

Grantee submit operations cost to NDCS for grantee reimbursement. NDCS then reports reimbursement totals to NCJR for each quarter. Total reimbursement is divided by the total number of participants receiving programming to get the cost per individual for the quarter across grantees.

Program Offerings

Program offering participations for Grant Cycle Four, Quarter Five (July 2021 – September 2021) are presented below. Program staff work with each participant to develop an individualized plan of programming unique to their needs. Many participants are involved in multiple program offerings at each program and some offerings available are not suitable for each participant. It is not necessary for a participant to complete each program offering to be considered a successful participant. Some may only complete one program offering, while others may participate in multiple offerings either back-to-back or simultaneously in order to complete the program. It is only when participants complete the necessary program areas that program staff will mark an individual as successfully completing. This is determined on an individual basis.

An overview of all program offerings each program offers and any updates to program areas is provided in Appendix A of this report. Program offerings have changed, and in some cases, will continue to change. Therefore, some of the data presented will not match exactly with previous quarterly reports on program areas.

The following program offering descriptions provide information on different services offered in each program. Each area details the services provided, the benefit or result a participant can hope to get from completing the area, the duration of programming, and the locations the program area is offered. Not all program areas or services are always offered, and participants may not participate in all program areas during their programming. As each participant goes through programming differently based on their individual needs, these descriptions provide more insight into the program area participations reported. Program offerings are updated quarterly to reflect what is currently offered.

Associated Builders and Contractors (ABC)

Participants are marked as successfully completing programming depending on where they are taking classes and their individual needs. Success is generally captured after completing OSHA 10-Hour Construction and General Industry training while in correctional facilities.
