

This February Discover Infrastructure Hubs: Collaborative Efforts Focusing on Federal Funding for Infrastructure Projects

Our upcoming virtual forum on Infrastructure Hubs dives into resource collaboration on federal funding. Perfect for those in the fields of transportation and local government, as well as academics and grant writers, this online forum offers an opportunity to learn about successful strategies that small and medium-sized communities can adopt.

With the federal government allocating billions of dollars for infrastructure development, it's crucial for localities to have the tools and knowledge to compete effectively for these funds. Infrastructure hubs represent a collaborative approach that leverages the resources of federal, state, and local governments, as well as government associations, to address the pressing needs of communities in a sustainable and innovative manner.

The Experts: **Calvin Reed**, with his expertise and experience as the Kansas Secretary of Transportation, and **Vicki Kramer**, in her role as the Nebraska Director of Transportation, are well-positioned to share insights and best practices gleaned from their respective states' initiatives. Their leadership and dedication to facilitating access to funding for infrastructure projects will undoubtedly provide valuable lessons for attendees.

This forum is particularly relevant for professionals involved in local government, transportation, and grant writing, as well as academics interested in understanding and promoting innovative approaches to community development. It is sponsored by the Nebraska Chapter of the [American Society for Public Administration](#) (ASPA) as well [UNO's Professional Programs](#)/ASPA forum series.

Don't miss this chance to engage with leading experts and explore new avenues for addressing the infrastructure needs of your community. Register now to secure your spot. It's held February 22, 2024 at 4-5 PM.
