## THE VALUE OF GENERAL EDUCATION

### GENERAL EDUCATION AND THE COLLEGE EXPERIENCE

A comprehensive college education provides students with knowledge that should enrich their lives and prepare them to face the challenges of living and learning in an ever-changing world. Courses that are part of UNO's General Education curriculum foster the development of certain intellectual skills and dispositions in our students essential to informed citizenship and an ability to effectively deal with complexity, diversity, and change.

### UNO'S GENERAL EDUCATION CURRICULUM

In addition to the requirements that may be set by each college, or those required for your major, students must also satisfy general education requirements. The University of Nebraska Omaha (UNO) general education curriculum strives to help you develop the following skills you need to navigate the demands of the 21<sup>st</sup> century environment successfully and responsibly:

- The ability to think clearly about complex problems;
- The ability to analyze a problem to develop workable and creative solutions;
- An understanding of the global context in which work is done;
- The ability to apply knowledge and skills in new settings; and
- A strong sense of ethics and equality.

### COMPONENTS OF UNO'S GENERAL EDUCATION CURRICULUM

The three main components of UNO's General Education curriculum include (a) fundamental academic skills in math, oral communication, and composition, (b) distribution requirements in humanities/fine arts, social science, and natural science, and (c) diversity requirements for U.S. and global cultures. Each of these areas and their sub-components are associated with specific student learning outcomes (SLOs) which are located on [UNO's General Education website](#).

#### Fundamental Academic Skills (15 CREDITS)

Proficiency in reading, quantitative skills, and written/oral expression are essential for professional success and effective citizenship. The courses in fundamental academic skills are designed to provide you with the foundation for advanced academic study.

#### Distribution Requirements (25 CREDITS)

Distribution requirements provide students the opportunity to: 1) understand, analyze, and explore the human condition; 2) understand the complex dynamics that make up the world particularly the challenges, problems, and factors that lead to social stability and change as essential for contributing to and living in contemporary society; 3) understand the nature of scientific inquiry and the operation of the natural, physical, and technological world for making personal and public policy decisions.

#### Diversity Requirement (6 CREDITS)

A 21<sup>st</sup> century education requires exposure to cultures and institutions around the world, as well as within your own society, in order to promote intellectual flexibility, cultural understanding and informed citizenship. UNO fosters cultural understanding to assist you in becoming responsible citizens in a diverse world.

# THE VALUE OF GENERAL EDUCATION

---

Students sometimes wonder why they are required to complete a broad curriculum of general education courses outside of their academic major. They do not always see a connection to how general education courses align with their goals of a degree, a job, and hopefully, a fulfilling life. The links below represent some of the resources you can use to stimulate discussion with your students about the value of general education and why it is important that they work hard, apply themselves, and learn as much as they can about different disciplines, perspectives, and methods. Ultimately, the skills they develop in their undergraduate general education courses provide a solid foundation for success in all of their academic, professional, and personal endeavors.

**Reason #1:** *Employers value the intellectual skills and dispositions at the core of UNO's General Education curriculum.* Employers have repeatedly affirmed the importance of a college graduate's ability to innovate, think critically, communicate clearly, and solve complex problems. In many cases, this is more important than choice of academic major.

**Reason #2:** *General Education courses help students develop skills and perspectives that will help them succeed in their academic major.* Occasionally students lament the "unfortunate" necessity of having to "get through" their general education courses before they can finally get to the important work of studying their academic major. However, it is not possible in reality to separate the academic skills at the heart of the general education curriculum from academic excellence in specific disciplines. These separate parts of a student's undergraduate education complement each other to broaden students' perspectives, ideas, methods, and approaches to complex issues in our world that can help them perform in their chosen discipline.

**Reason #3:** *Exposure to different values, perspectives, traditions, a cornerstone of UNO's General Education program, is important to engaged citizenship, meaningful careers, and fulfilling lives.* A 21<sup>st</sup> century education requires exposure to other cultures and institutions around the world, and within one's own society, in order to promote intellectual flexibility and responsible and informed citizenship.
