

## DLM#4

### QUESTIONS

1. What is the most likely deepest lake in Afghanistan?
2. What is the largest (surface area when full) lake in Afghanistan?
3. What lake serves as a valuable groundwater recharge place to bring up the water table that has been going down and making wells dry up so that they had to be dug or bored down deeper?
4. What lake was formed inside an old extinct volcano?
5. What lake was formed by a huge landslide that blocked the valley?
6. What two lakes head tributaries to the Panj?
7. What two lakes were formed by movements on faults (earthquakes commonly occur on faults too).
8. Why are lakes sometimes salty?
