## French Language & Culture

Improve your French skills, participate in extra-curricular activities such as sports and music, and earn UNO credits during a five-week immersion program at Laval University in Quebec City. The city itself, founded in 1608 by Champlain, has a great deal to offer both culturally and historically. Enjoy the "festival d'été" in July and the "Fêtes de la Nouvelle France" in August, when hundreds of French musicians give free concerts throughout the city. During this five week intensive language program, students will learn about Quebec civilization, cinema, literature and more. Students have opportunities to speak French on a daily basis in conversation tables, participate in festivals, and many more cultural activities!
