

To preserve our planet and create a healthier community, CBA Green Team urges all catered events in Mammel Hall to  using Styrofoam®

THE UGLY FACTS ABOUT STYROFOAM

- The common generic trademark for EPS foam (expanded polystyrene #6 plastic), Styrofoam® is composed of benzene and styrene, **known human carcinogens**.
- The production of Styrofoam results in air pollution, creates large amounts of greenhouse gases and **damages the ozone layer**.
- Styrofoam is **NOT biodegradable** and cannot be recycled.

PICK A NON-STYROFOAM CATERER for your next event:

UNO PREFERRED
