Cascade CMS
Basics

Logging in to Cascade

cms.unomaha.edu

Username: NetID (e.g. jsmith)
Password: Password associated with your email/NetID

Quick Tip: Go to the page you want to edit on the live site, scroll to the footer and click the copyright symbol and it will take you to that page in Cascade.

Dashboard

Once you log in at cms.unomaha.edu, you’ll be taken to your dashboard.
Your dashboard is comprised of widgets; you can move, add or delete the widgets on your dashboard. This is your space and only you can access it.

**My Content**

- **Recent**
  Lists the pages you have recently edited

- **Owned Content**
  Pages you’ve been assigned to edit or review

- **Drafts**
  If you’ve edited a page but not submitted it, you can find it here (you didn’t lose it!)

- **Workflows**
  For Cascade approvers – these are the pages that have been edited and need your approval

- **Locks**
  Pages that have been locked by a user so only they can edit it

You can go to your dashboard from any page in Cascade by clicking the Cascade logo in the upper left corner of the toolbar:
Cascade CMS Basics

Editing a Page

You can only access the sites you have been assigned to; you can find your site(s) by clicking “Go to Site” in the upper left corner:

A list of your sites will appear. Click on the name of the site to go to it:

The first folder is your site. The folders under contain the pages for that area. This folder structure creates each page’s URL:

It’s important for each page to “live” in a folder.
Cascade CMS
Basics

To see the folder’s contents, hover over the folder name and click on the arrow to the right of the name:

Click the page you want to edit:

Click Edit in the toolbar

Scroll to the area where you want to make the edits, and click the arrow next to the section name:

Use the WYSIWYG to edit the content.

Adding a Bulleted List
Creating a Jump List
How to Use HTags & Tips about Writing for the Web
Creating a New Page

If you need to create a new page, navigate to the folder in which it will live, and click on the arrow to the right of the folder name.

Go to the top toolbar and click the plus icon next to “Add Content”

Select the appropriate template (this is usually the Unit Standard Page or the www Standard Page)

Name the page using all LOWERCASE words and separate words with hyphens.

**Quick Tip:** Don’t name your page with an acronym or abbreviated text that the general user would not understand. This page name appears in the URL.

Each page **must** have these fields completed:

- **Page Name**: Must meet the following requirements: Lowercase only, Word spaces replaced with hyphen, and leading and trailing spaces are not allowed
- **Placement Folder**:
  - about-us
  - CAS - Biology/about-us
- **Display Name**: [Gray Banner + Navigation + H1 tag]
- **Title**
- **Summary**
- **Description**: (Include a short, specific description of the content on your page for improving search engine results pages (1-2 sentences))
