

Greetings,

UNO is excited to announce a fresh look and feel coming to MavLINK (the campus student information portal) on April 17. Changes to the look and feel are intended to provide an easier to use interface that provides quick access for vital student functions like enrolling in classes, displaying account balances, requesting transcripts and accepting financial aid. The user interface and design will allow students to access information across any device they may be using, and a consistent experience with the desktop version of MavLINK. A focused effort was placed upon providing students with important information as quickly as possible in the form of “to-do lists” and “messages” along with improving performance.

The new MavLINK experience is the result of many months of work, and soliciting input from students and offices across the entire campus. The MavLINK team is always seeking feedback pertaining to this service. Please direct your feedback to the MavLINK Change Management Team at the following email address:
