For our students who are parents, Coronavirus has changed reality rapidly and created the daunting task of figuring out how to keep active children active and motivated to learn.

This is compounded by your own need to learn and scheduling periods of study for you while scheduling time to engage with your child(ren) while they learn. Hearing from a few of our student parents, we thought we’d offer a few links to prompt ideas for engagement while kids are stuck at home. While this time can be stressful, some student parents are finding enjoyment in exploring new interactions with their children.

We’ll be updating our initial list weekly!
