

How to Find Related Links on Webpages

If you need to remove a document (like an old PDF) or an old webpage from the website, you will first need to find other pages on which the file or page is linked to ensure there are no broken links on the site.

- Ensure you're on the document or page you want to verify is linked from another page.
- Go to the toolbar and click ...More>>click Relationships

- A new window will appear if the document or page is linked on other pages. Click the page link on the left under "Asset":

Relationships to page

CAS - English: /academics/advising

Close

The assets shown either directly link to this asset OR are related by a created publish relationship. Only relationships created here can be broken here. To delete a linked relationship, edit that asset directly.

Create a manual relationship

Choose Publishable Site Content

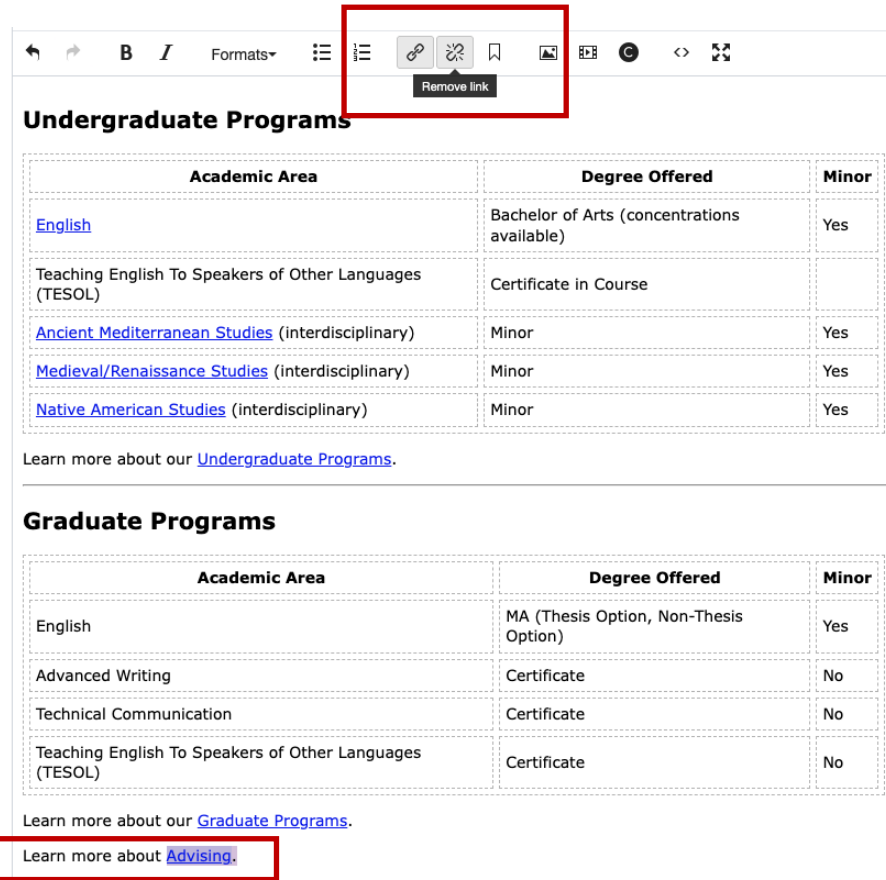

☐ Publish All

Search

Asset	Last Modified	Owned By	Relation
☐ header CAS - English: /_includes/header	Jan 28 5:40 PM by 		Linked
☐ index CAS - English: /academics/index	Jul 31 1:59 PM by 	No one	Linked

- You will be taken to the page and will need to scan the page to find the link. Make sure to look at the sidebar under “Related Links” or “Additional Resources.”
- Find the link>>highlight it>>click the unlink icon in the WYSIWYG toolbar:

The screenshot shows a WYSIWYG editor interface. In the top toolbar, the 'Remove link' icon (a chain link with a diagonal slash) is highlighted with a red box. Below the toolbar, the page content includes two tables.
